

THE GLEICHEN

VOLUME XXXII NO. 4

GLEICHEN, ALBERTA, WEDNESDAY APRIL 12, 1939

SUBSCRIPTION \$2.00 PER YEAR

COUNCIL ESTIMATE \$17,000 WILL BE NEEDED THIS YEAR

The town council transacted considerable business at its meeting held last week with Mayor Menard and Councillors Michael, Wright, Brown, Macdonald, and Thompson present. E. W. Brown, Don Bond, M. Bolinger and Mrs. M. A. Brown paid the councilmen a visit.

Measles, Brown, Bond and Bolinger represented the curling rink and waited on the council to discuss matters pertaining to the rink. The club is in arrears for taxes. Mr. Bolinger was of the opinion that all public buildings were exempt from taxes and he thought the town would be well advised to keep the rink going. It was pointed out that curling rinks in other towns were not taxed.

The delegation presented the property to be transferred to the town, and the town lease it back to the Curling Club for five years would be of the order of buying it back at the end of that time. The town would be asked to grant permission to move the rink from its present site to the other side of the property, as it was the intention to enlarge the rink to three sheets of ice the cost of which would be about \$400. The amount being raised by voluntary contributions. It was pointed out to the council that this kind of arrangement would benefit the town in that it brings a great many people to the place, and also it afforded entertainment for the children. The council left the matter in abeyance for the time being and the secretary was instructed to write to Edmonton for ruling on the matter.

A man waited on the council in regard to a house. He stated he had tried to get a house at Glen House but had not been able to do so. At this time a man was a provincial chair. It would be necessary to get a ruling from Edmonton and he would be informed as soon as possible regarding the matter.

Geo. Hunter owner of the Gleichen Hotel called the council to visit. The council stated that it would be impossible to let the hotel building up. It was used as apartments. The building would have to be re-wired, the heating system was bad and it would be a great fire hazard.

An application for additional relief was made by an individual as he found it impossible to get along on the present allowance of \$11.50 for groceries, \$2.00 for milk, \$1.00 for fuel and clothing additional. The council decided there would be no change in the relief.

The zoning by-law had been approved by the department at Edmonton so the council gave it the third reading.

A questionnaire had been circulated to the ratepayers not at present served by town water and sewer, in order to obtain information as to whether they wished to have a water system extended over the entire town. The results showed that the majority were against having the town water. The council decided to leave the matter over until another meeting.

The council had been approached by the school board with arrangements for the school children to see the king and queen. The parents of the children had been circulated in order to ascertain the number of children that would likely be going to Calgary. The council instructed the secretary to advise the school board that it would seem that the school board was in a better position to get the arrangements for the children to get to Calgary than the town was.

The estimates were the next subject. The estimates for the public works were cut from \$110 to \$100 and rip-rapping the ditch along the land in block 6 was cut down from \$100 to \$50, reducing the public works from \$110 to \$50. In water works the amount of \$50 for repairs to hydrants was cut out entirely, leaving only the bare standing charges. In the irrigation, a long discussion arose as to whether the swimming pool should be maintained this year, if so, a life guard would have to be provided. It was pointed out that very little interest was

News Items of Local Interest

Mrs. McConnell and daughter Jean were returned to town after spending the winter in Calgary.

Miss Peggy Yates, who is attending Normal in Calgary, spent the holiday in town visiting her parents, Mr. and Mrs. A. R. Yates.

Miss P. Halsed who has been attending normal school in Calgary was a visitor to her home here during the holiday.

Good Friday in town was more quiet than a Sabbath day. Probably that was caused by the beer parlor being closed.

The Easter parade in Gleichen was a flop. The weather hadn't anything to do with it, sure, likely it was a financial embarrassment.

Miss Van Volkenburg, who for some years was on the teaching staff of the Gleichen schools but now living in Calgary, spent the week end in town visiting friends.

New license plates on cars are slowly making their appearance. Probably half of the cars now have them. The color of the plates make them look more attractive than the ones just discarded.

Glen House, the south Arrowhead cattle rancher, is a visitor to town Saturday afternoon. Mr. House states his cattle came from the winter in fine shape. He has been moving some of them to market.

Mr. Lindsay laid the Meadowbrook Social Credit Group held the last card party of the season at the home of Mrs. J. J. Meathur. Six tables of court were played. The first prize being won by Glen Calkins and Mr. Orville Calkins, while the booty prizes were carried off by Mrs. Ollie Calkins and Harry Harrison. A delicious supper and social evening concluded the evening. The next meeting is scheduled for next month for this form.

of recreation and that a lot of damage to the bath houses and other things had been done. The estimates for irrigation was left at \$1154 which covers standing charges only. With these reductions the total estimate for the current year's expenses amounted to \$17,000.

After discussing many other subjects the meeting adjourned.

THE WEEK IN EDMONTON

Prorogation of the eight session of the eighth legislature came at 12:40 p.m. on Monday, April 3 when His Honor Lieutenant Governor J. C. Brown closed regular proceedings in traditional manner. With the bills which he had already given royal assent, his Honor now assented to the remainder, which brought the total to 102.

The session opened Thursday February 9, and it lasted just short of eight weeks. The House sat for 37 working days in the House, and in all 405 bills were introduced. These bills, each introduced by private members, were killed in committee. They were the hairbrushes bill, the dental mechanics bill, and the bill to amend and consolidate the dental act.

The latter drew some stormy comments on Monday and the debate was so vigorous at times that proffered seemed about to be set off for another day. Chief objector was J. H. Ure, who attacked a number of clauses as being undemocratic. Just before recess he moved that the chairman leave the chair which would have meant the virtual killing of the bill at that stage. He was not successful that night, but later the chairman was instructed to do just that and the bill died.

A poignant note was struck early in Monday's proceedings when Premier Albert and leaders of the opposition voiced regret at the death of William E. Haynes, social credit

allied to be held on April 13th at Mrs. Eldred's home.

Mr. and Mrs. A. Thorburn announced the marriage of their eldest daughter, Agnes H. Bullen to Ernest J. Payne, eldest son of Mr. and Mrs. S. C. Payne of Quenowman, April 1st, at Knox United Church, Calgary. Rev. C. H. Morrison officiating.

Mr. T. C. Brown, son of Mr. and Mrs. Robt. W. Brown and Miss M. Young, daughter of Mr. and Mrs. James Young were married Saturday. They are spending their honeymoon on a cruise in the Pacific ocean.

Mr. and Mrs. Wm Busby will celebrate their silver wedding anniversary on Tuesday April 18th. They were married in the Pro-Cathedral, Calgary, and have lived in Gleichen since then with the exception of the time Mr. Busby enlisted during the great war and served overseas.

Club joins with their many friends in wishing them many happy returns. Mr. Busby has received word that her brother Mr. Harry Geary of Havelfield, Lys-Green road has returned from the postal service after serving for 46 years. A clipping from an old country paper says in part: "Mr. Geary received the Imperial Service Medal in recognition of his long association with the work of the C.P. Cheatham Post Office. He joined May, 1893 and was one of the first telegram messengers in the town. At that time every telegram and letter had to be delivered on foot, for no bicycles were provided for the staff, and he can remember the time when few motor cars visited the district had been preceded by a man carrying a red flag. For more telegrams were received locally than sent. In recognition of his help to Lathin people, the Lathin villages have presented Mr. Geary with a handsome bird-bath for his garden."

member for Stony Plain and a member of the Social Credit board. Rank and file members followed, all were unanimous in their expressions of sorrow at the passing of an extremely kind and kindly public servant.

Mr. D. M. Duggan, leader of the conservative party, said that in such a time all party affiliations were forgotten. He added that no matter how long disagreed with the beliefs of Mr. Haynes, it was impossible to become an enemy. He was a gentleman, always. Mr. E. L. Gray spoke in a similar vein.

At the post session caucus among Social Credit members, they decided to accept 50 per cent of their seasonal indemnities in treasury vouchers. This will mean something in excess of \$50,000 circulating in that form. Total appropriation for legislative purposes ran to approximately \$129,000. M.L.A.'s receive indemnity of \$2,000. Cabinet ministers and the chairman of the Social Credit Board receive indemnities of \$1,500.

There are special allowances in addition to these. Mr. Speaker is allowed an additional \$1,400 and the deputy speaker \$750. \$2,400 is allowed to the leaders of opposition groups.

Important bills passed during the session include the marketing act; the pipelines control act; the petroleum products price control act; the revised limitations of actions act; the new lands act and public stockyards act.

ITEMS OF INTEREST OF THE TOWN AND DISTRICT

Ashley Sauer is sporting a brand new tractor these days and finds it a grand thing to get around the farm with.

Wm. MacCallum who is attending school in Calgary spent the week end in town visiting his parents Mr. and Mrs. F. MacCallum.

GUNNERS PRESENTED LEATHER COATS DURING BANQUET

The Athletic Club entertained the Gunners to a banquet and dance one evening last week, in honor of their having won the Morgan cup emblematic of the hockey championship of western Alberta. The Gunners won the cup under the able management of 17m Brown, local hotel man and town councillor.

George H. Gooderham, honorary president of the hockey club introduced to president of the Athletic Association, J. H. Nelson, who in turn welcomed the guests of honor and the citizens present. Fifteen leather coats were presented by the Athletic Association to the members of the team in recognition of the efforts during the past season. T. H. Beach made the presentation. The Morgan Cup was then officially presented to the captain of the team, Bob Brown by Mayor Frank. The team was then presented by the Gunners to the Amateur Hockey Association. Mr. Moss was manager of the team when they won the same cup in 1928.

Tom Johnston, a former member of the Gunners but now with the Trail Smelter, attended the banquet having returned from Europe in time to attend the affair. He was presented with an engraved ring by Bob Haskayne on behalf of the fans.

FARM WOMEN PLAN SOCIAL RALLY NIGHT

Mrs. J. C. Hutchinson was hostess to the ladies of the U.F.W.A. last Thursday afternoon, when 12 members and four visitors were present. The meeting opened with a song. Minutes and correspondence were then dealt with by the president. Discussion took place regarding a social tea planned to be held on Friday April 28th also a joint rally night for May 19 in the Meadowbrook Hall.

Two new members were added to the list, Mrs. S. Perry and Mrs. Wip. A bulletin on horticulture and cancer control were read and proved to be very interesting. University women were discussed as was also the Youth Congress. A donation will be made to finance the delegates expenses.

Mrs. J. C. Buckley then thanked the organization for the social and lovely tea given her and Mr. Buckley on the occasion of their 55th wedding anniversary on March 30th.

The meeting then adjourned to enjoy a social hour when coffee and a plentiful and delicious luncheon was served by Mrs. Hutchinson. The members will meet again on April 20th at the home of Mrs. Geo. Yule.

W. W. Brown had a birthday last Thursday, in fact he has had 72 of them. A number of his old friends surprised him in the evening with a birthday party at his home when the time was spent in talking and playing cards. At midnight the ladies served a delightful supper at table adorned with flowers and a beautiful birthday cake which Mr. Brown in appropriate fashion and great dignity cut into numerous pieces for guests. Mr. Brown willingly got into a predicament which caused great hilarity among the guests. All who attended agreed that they had a swell time (they ate everything in sight) and hoped that Mr. Brown would have many more birthdays and continue to enjoy his usual good health.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Private Kenneth H. McPhee has returned home from the war. He wears a military medal and was wounded.

Miss Dalgleish of Woodville, Ont., and Mr. Dalgleish of Bridgewater, N.S. arrived in town to visit their niece Mrs. G. W. Evans.

N. T. Purcell is the new proprietor of the Palm Parlor.

Mr. G. Hyde of Cluny is reported to be quite ill at Vancouver. Mrs. J. K. Crapo slipped and fell from the fall suspended a fractured leg.

Wm. McConnell has returned from

Vancouver where he was called owing to the death of his brother. Of eight brothers who went to the front this is the only one to die as a result of his wounds, although another brother is in a serious condition in England.

The Farmers Hall at Milo is proving a good thing for the people of the Quenowman district as a hospital. In fact it is hard to say how some would have survived without it during the flu epidemic of the past winter. On Monday there were no less than 30 cases of flu in the hall.

Mrs. James Walker slipped on some ice last week and was unfortunate enough to dislocate her wrist very badly.

C. L. Farrow former manager of the Revelstoke lumber company here died last week in Calgary.

P. N. Lett who has been manager of the Royal Bank here for two years has been transferred to Vancouver. Alfied Dawd drove in from Fraserford and spent a few days here visiting his brother Frank. This was his first visit to Gleichen in five years. The Alberta government is ready

to erect a bridge near the present ferry at Carleton and if the location is satisfactory to the people of that district it will be erected this summer.

W. W. Brown had a birthday on Friday last and as he was about to retire for the night thirty-five of his friends appeared at his home and wine, dinner and two-fer cented him until the small hours of the morning. That's the worst that happens to a popular ball in the wild west these modern days.

Mr. George Kingmish and Miss Clara Slay, both of Quenowman were married last week.

A Despas has bought a farm near Cluny and is busy moving on to the property.

Sergt-Major Victor L. Scott and Private Ralph Prestwick have returned home from the war.

The Call has it on good authority that the telephone line will be extended directly south from Gleichen to a point near the old Blackfoot reserve line south of the river. This will be much appreciated by the farmers of the Arrowwood district.

"A Pig in a Poke"

In early days the word poke, meaning a bag, pouch or sack, was commonly used. We're told that a favorite trick at fair was to tie a cat in a bag and sell it to a greenhorn for a sucking pig. If he opened the sack at the fair he "let the cat out of the bag." If he didn't discover the deception till he got home, he was laughed at for buying "a pig in a poke."

There's no such thing as "a pig in a poke" at EATON'S. Before each Catalogue is printed the experts in the EATON Research Bureau read every statement to be made regarding all the merchandise presented. Hence if we say an article's All-Wool—it is All-Wool. There's nothing vague—nothing uncertain—nothing that can be taken two ways. Always, you KNOW what you're getting.

That's why, at railway stations, docks and airports in the West, you see mail bags by the hundreds and freight trains on their way to the ton from EATON'S—proof positive of the confidence our customers have in us.

Cost Of Government

Probably very few people who join in the popular clamour for government expenditure for relief, for public and social services for subsidies and for numerous other concessions, too often with the idea of benefiting themselves beyond actual need or to gain something for their community realize the expense they are adding upon themselves and upon their fellow citizens.

If they did, it is probable that many of the demands which were made upon the federal, provincial and municipal governments would be considerably curtailed and some of them would not be made at all. The people themselves would be more vigilant in their efforts to prevent relief racketeering such as was recently revealed in criminal court proceedings in one of the municipalities in Saskatchewan and the public conscience would result in curtailment of some of the demands which are constantly being made for services, favors and concessions which the country is unable to afford at the present time.

Governments are not altogether to blame if they yield to constant and enormous pressure which is constantly being brought to bear upon them for unnecessary expenditures or for services for which the means are not forthcoming without pledging the country, the province or the municipality to indebtedness beyond ability to repay.

It is the people themselves who thoughtlessly make demands without counting the cost and who regard the governments as a widow's cruise of old who are culpable, and until they fully realize what the cost of government is to them as individuals, the avalanche of demands for more services of one kind and another is not likely to abate.

Unappreciated Costs

One of the difficulties of bringing home to the public consciousness the burden which the people must carry as a result of these demands for multi-million government increasing services is the fact that much of the taxation imposed to pay for it is the indirect form, what might appropriately be termed hidden taxes.

The average middle class woman who goes into a store to spend a dime or a dollar is not conscious, or at the best only vaguely aware, of the fact that a percentage of that dime or that dollar is going towards the cost of government and government services. A portion of the dime or the dollar goes to the federal government, sometimes another slice of it goes to the provincial government and in some cases all three governments take a share of that dime or that dollar.

Even those who have a dim conception that when they are purchasing commodities and services they are contributing towards the cost of one or more governments have not the faintest idea of what proportion of the money they are spending has been spent on relief in various forms and must be added to the cost of government services. It is not probable that the governments would not be subjected to this continual bombardment for more and more expenditure.

As already intimated it is difficult for people to appreciate and realize the cost of government services largely for the reason mentioned, but one authority, Capt. W. C. C. Innes, managing director of the Taxpayers' Association of Canada, in a recent article in the Labour Review declared that taxes, but because of indirect taxation are about two-thirds of the total taxes collected.

The same author states that the public debt is now approximately eight billion dollars, while \$900,000,000 has been spent on relief in various forms with prospects that it will reach a total of one billion dollars this summer. The annual interest charge on this big debt, he states is \$300,000,000 which divided equally among the eleven million people inhabiting the country means an average yearly charge of \$28 per person. Very properly, of course, the burden is not equally divided, for those with larger incomes contribute a larger share than those with smaller incomes on the basis of one of the fundamental principles of taxation, "ability to pay".

Without An Asset

Of the many problems facing the country and which have been responsible for building up the heavy debt, Capt. Innes rightly regards the unemployment problem as the most serious, not only because of the large sums which have been spent on direct relief without any return for the expenditure in the form of assets, but because of the effect of this system of aid upon the morale of the recipients.

Reference has already been made to the beneficial effect of direct relief as exemplified in recent destructive actions, but it is not possible to say much of the causes for complaint against this type of aid would disappear if a policy of requiring more return in the form of work for the money spent by all the governments concerned in the administration of relief were adopted.

As Capt. Innes appropriately comments in the concluding paragraph of his article: "There is a growing tendency to rely on the governments for this, that and the other thing, not realizing that we, the people, are the government, and in the long run we pay in full for our unthinking selfishness and folly."

Helped By Office Staff

Map Changes

Man Able To Hold Job Because Colleagues Were Kind

There is a story to match the one we had a while ago about a member of a Toronto office staff clubbing together to pay for plastic surgery to the scarred face of a fellow employee. A young chap in another local office became deaf through mastoiditis caused by diving. The handicap was affecting his work and blighting his life generally. Quietly his colleagues chipped in and bought hearing instruments for him—some of those wonderful, inconspicuous things that work by bone conduction of sound, or something. He could never have afforded it himself, since he is the main support of his family. The thoughtfulness of his colleagues and associates has made things worth while for him again and he is the haunting fear that deafness would handicap his future—Toronto Telegram.

Napoleon Was Honored

Napoleon in 1802 was made an honorary member of the American Academy of the Arts soon after his Egyptian campaign led to finding the Rosetta Stone, and to reading Egypt's hieroglyphics.

From birth to maturity, the human body increases in height three times, the upper limbs four times, and the lower limbs five times.

For instant relief from chest colds, ordinary sore throats.

ROBERTSON'S GREAT CANADIAN RUBBER LINIMENT

Today's mince pies are descendants of England's popular "mince pies" of 1596, "minced pies" of Queen Elizabeth's time, and the "shred pie" of 1706.

It is said that 808 breadstuffs for the relief of sick persons are successful in 54 per cent of the cases. 2362

THAT REMINDS ME—THERE'S MORE VALUE FOR THE MONEY IN OGDEN'S

"Roll-over, owners!—There's more value for the money in OGDEN'S."

Ogdens for real money's worth. They know that Ogdens gives the highest prices for smoking pleasure, that it pays more dividends in cooler, sweeter smoking.

No Commercial Value

But Islands Taken Over By Japan Are Good Air Bases

The government at Tokyo has notified the United States that it is assuming jurisdiction over the Spratly Islands in the China sea—strategic points between French Indo-China and British North Borneo. France occupied the islands in 1933. The group of seven islands have an area of 247 acres but are without great commercial value. However they surround lagoons which could afford harbor facilities for seaplanes, submarines and small naval craft.

Occupation of the islands by France in 1933 was the first claim of ownership since their discovery in 1867.

SELECTED RECIPES

BUTTER CAKE

2 cups sifted cake flour
2 teaspoons double-acting baking powder
1/2 teaspoon salt
1/2 cup butter or other shortening
1 cup sugar
1 egg, unbeaten
1/2 cup milk
1 teaspoon vanilla

Beat sugar and butter, add baking powder and salt, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add egg and beat very thoroughly. Add flour, alternately with milk, in amount of 1 at a time, beating after each addition until smooth. Add vanilla. Bake in two greased 8-inch layer pans in moderate oven (375 degrees F.) 25 minutes, or until golden.

BANANA GINGER CREAM CAKE

Use recipe for Butter Cake. Bake in greased pan, 8x8x2 inches, in moderate oven (375 degrees F.) 30 minutes, or until done. Split cake in half to make two layers. For filling, whip 1 cup cream and fold in 2 tablespoons chopped candied ginger. Spread layer of cake with about half of whipped cream; cover top layer with remaining cream, and garnish with border of banana slices. Bake two to three bananas.

JELLY TART CAKES

Use recipe for Butter Cake. Bake in greased cup-cake pans in moderate oven (375 degrees F.) 20 minutes, or until done. Cut each cake crosswise to spread. Spread between two layers and on top of cakes. Whip 1 cup cream and spread on sides of cakes. Make 2 dozen cakes.

Salvador Dali, prominent surrealist painter, claims that it is enough to create paintings without being tied to interpretations. Besides, a true surrealist should not concern himself with such a minor matter as meaning.

Visitors On Lonely Isle

Passengers From Liner Left Gifts At Tristan Da Cunha

Wounded visitors were landed recently at Tristan Da Cunha, perhaps for the first time in history. The island, a volcanic, almost settled island, this south Atlantic spot was visited recently by passengers of a liner and gifts left with the 130 inhabitants. Substituting for a product of a barren, rocky island, the dwellers refuse to leave and are not bothered about a radio net that never works.

Today's mince pies are descendants of England's popular "mince pies" of 1596, "minced pies" of Queen Elizabeth's time, and the "shred pie" of 1706.

It is said that 808 breadstuffs for the relief of sick persons are successful in 54 per cent of the cases. 2362

The Naval Race

Not Normal Music

United States To Build World's Largest Battleship

The President has exercised the right given to him by the Naval Expansion Act of 1938 and has given the navy authority to proceed with the construction of two 45,000-ton battleships.

Behind the debate over the Naval Expansion Act lay an Italian newspaper story to the effect that Japan had laid down two 42,000-ton battleships.

That story, printed in the Fall of 1937, has not been confirmed from Japanese sources, but how successful the Japanese are in guarding the details of their naval building program can be judged from the fact that the First Lord of the Admiralty, under Japan, battleship, building and projected, is found the terse entry: "Not known."

Presumably the President and his naval advisers have discovered more evidence than the Italian authorizer of 1937 affords that Japan, some other power is building battleships larger than 35,000 tons.

So far as available information goes, it is expected that the battleship means to national defense the layman perhaps is not qualified to say, but the navy believes that it approaches, if it does not touch, the policy of putting all their eggs in one basket. Synthetic steel, naval construction increases disproportionately to the increase of tonnage battleships of 45,000 tons are expected to cost in excess of \$100,000,000 apiece.

Synthetic steel, naval construction increases disproportionately to the increase of tonnage battleships of 45,000 tons are expected to cost in excess of \$100,000,000 apiece.

Natural Gas Dynamite

New Powerful High Explosive Is Announced By American Chemical Society

Natural gas dynamite, a new, cheap, powerful high explosive, was announced by the American Chemical Society.

The discovery means, it was stated, limitless quantities of high explosives can be made from air, natural gas and steam alone. A new chemical synthesis, discovered at Purdue University, extracts from natural gas two new explosives, as destructive as nitroglycerine, the high of all detonating explosives.

The stratagies was reported by Professor Henry B. Haas, head of the chemistry department, Purdue University.

One of the new destroyers is made from methane, common "fire-damp" or marsh gas, and abundant in natural gas. The other is a non-toxic, colorless, odorless gas also found in natural gas.

Both condenses to a solid when treated with formaldehyde. Nitrogen is then added. This makes a mixture which can substitute for nitroglycerine.

Germany Buys Cotton

Takes Entire Crop From Nicaragua On Barter Basis

Germany has purchased on a barter basis the entire cotton crop of Nicaragua and also large quantities of coffee, cottonseed oil, rubber, hides, deerskins and cabinet woods of all classes. Large German tramp ships are now loading at Corinto, Nicaragua will receive in return barbed wire, nails, Diesel trucks, automobiles, hardware and pharmaceutical products. Producers would prefer to sell their cotton to other countries cannot purchase all Nicaragua's exportable products.

Age Limit Raised

The London Daily Mail says men are not too old at 40 in the Navy. The Admiralty has decided, as a temporary measure, to raise the age for the warrant rank of Gunner (T) torpedo branch—shall be eligible for promotion up to the age of 40 instead of 35 as now. Reason: A shortage of petty officers who wish to become warrant officers.

Must Expect A Prisoner

The London Times says that Parliament, the smallest in the world, has decided to repair the roof of its prison, which has housed only three prisoners in a hundred years. Once a servant girl being shut in the little cell for stealing was nervous at being left alone, so the door was left wide open that she might be cheered up by seeing the passers-by.

The Zoological Survey of India reports that mails—when completely starved—can live on reserves of food in their tissues for about four months.

Jazz Result Of Cultivated Musical Depravity States Authority

There has sometimes been circulated the idea that jazz is the normal music of the common people. On the contrary, it is highly cultivated. As a result of a cultivated musical depravity, says Dr. James Francis Dineen in Etude. A few years ago, an explorer took a field-trip on an expedition to the jungles of the Orinoco River. The white men almost invariably demanded jazz; the Indians, who had never been out of the jungles, who had never heard any white man's music, went into raptures over grand opera and symphonic concerts. And when Kentucky mountaineers travel 20 to 30 miles by wagon and by mule-back just to hear a program at a "listening broadcast station," they show a curious disdain for jazz. They are instantly delighted by the better music and the symphonic programs, but hold their breath when the noise of the Harlem bedlamites is turned on. Their natural taste has never been perverted.

Lag In Research

Is Hampered By The Lack Of Workshop Accommodation

Scientific research in Canada is hampered by lack of workshop accommodation and scarcity of skilled mechanical assistants at many of the country's universities. Dr. Charles D. Ellis, head of the University of London's department of physics, believes.

Dr. Ellis is surveying Canadian research centres at the invitation of the Conference of Canadian Universities and with the support of the Carnegie Foundation.

The house of Rothschild was the first money-lending organization to operate on an extensive scale, founded in Frankfurt-on-Main, but had subsequent branches in Vienna, Paris, London and Naples.

Woman Smuggles Rings Out Of Czechoslovakia In Bologna

An aged Czechoslovak woman being by train from Halifax to a new home in western Canada, two cherished rings she had smuggled past German officials in a roll of bologna. The meat remained in Halifax.

Customs officers said the rings, cleverly hidden in the highly-spiced, home-made bologna were found when Dominion agriculture department officials, acting under government regulations, confiscated the meat shortly after the woman arrived in the Duches of Richmond.

THE OUTSIDER VS. The Local Printer

Many business men, when considering the cost of any particular job of printing, look only at the small sum they may be able to save at the time on any order. They fail to ask themselves what the outsider leaves with them throughout the year in the way of business as compared with the local publisher. He also seems to forget that if he and his fellow business men would get more of their printing requirements done in their home town the publisher might be able to employ additional help, which would still further swell the amount of money to be spent in the home town.

Always remember! A dollar spent with a firm in a distant town is gone forever so far as its service to the community is concerned. A dollar spent with other firms in the home town stays there and performs many good services, in its own community. Get your printing requirements from

Town & District

Mrs. R. S. McQueen has been confined to a Calgary hospital, seriously ill.

Frank Woods of Duchesne spent the Easter holiday in town with his parents Mr. and Mrs. E. W. Woods.

The Gleichen twins had a birthday Saturday. No details of the celebration are available.

Mr. and Mrs. Lynn spent Easter at Delta, visiting Mrs. L. M. M. parents.

Miss Myrtle McBean of Alta spent Saturday at the home of her parents, Mr. and Mrs. Duncan McBean.

M. Murray has been confined to the Bascom hospital for the past three weeks with rheumatism.

UNITED CHURCH

Rev. J. N. Wilkinson, minister.
Mrs. H. Birch, choir leader.
Miss Majorie Birch, pianist.
11 a.m. Church School.
7:30 p.m. Divine worship. Subject: "The Forty Days."

The time between the Resurrection and Ascension of Jesus is believed to have been forty days and many people have been curious to know how that time was spent and in what form Jesus appeared to His disciples. Our sources of information are few but when carefully studied do give us some light. An effort will be made on Sunday night to sum up the information that is available.

THE WORLD OF WHEAT

By H. G. I. Strange, Director of
"Crop Testing Plan"

"Farmers lose, over a term of years, as much money from root rot damage to their crops as they do from black stem rust!"

This startling statement was made to me several years ago by a leading Canadian authority on plant diseases. All that I have heard since tends to confirm what he then said.

"But we know that rust has taken on the average, over a term of years, about 10 percent of the farmers' crops. The toll taken by these root diseases, too, therefore, must be very great. Can anything be done to stop this large steady annual loss?"

Fortunately for the farmer it has been found that treating seed before sowing with mercurial dust, Ceresan or Lysotan, greatly lessens damage from root rot diseases.

The mercurial dust treatment has the further advantage that it will also prevent damage from stinking smut or bunt.

The use of fertilizer, too, sown into the ground with seed is now common practice on our prairie. While it the crop matures earlier, shows a higher yield and the grain has a better grade. Besides this, fertilizer certainly decreases damage from wire worms. It is good practice, and farmers, I recommend, should certainly consider it.

Following factors have tended to raise price: France to reduce duty against Roumanian agricultural products. Abundance of Australian wheat offers. Unlike world crops will equal those of 1938. California fruit crops damaged by severe wind. Unfavorable Argentine government corn report. Wind damage modifies excellent Italian winter wheat prospects.

WHEN A MAN COOKS

Give a man a chance and he will roll up his sleeves and cook a dinner for the pure joy of it! Give him a choice and he will take some tender little fillets of whitefish, quick frozen in the protective transparent wrapping, and spread them with butter, and broil them quickly at a high temperature. Men may not pay much attention to the fact that this preserves all the original flavor, they do it this way because they have tried it often over the open fire after coming in happily after a day's fishing. But that's the secret of a tasty dinner. These quick frozen fillets do not need to be thawed, and ten minutes under a hot flame finds them cooked to a man's taste.

Broiled whitefish: Fillets Canadian whitefish, butter, lemon juice. Remove the fillets from their transparent wrapping and place on a greased broiler. Spread lavishly with butter, add some lemon juice, and broil for 10 minutes.

If it is left to the man to fix the rest of the dinner. You'll find that he'll have boiled or baked potatoes cooked in their jackets and some sliced onions sautéed in butter or bacon fat. If he finds some parsley around, he may use it for a garnish, but he won't spend any extra minutes hunting around for it—with a man it's a case of cook and come and get it!
